Subject: Service Champ 3 5/8" Filter Consolidation

The replacement market for 3 5/8" filters continues to decline. The 3 5/8" filter has not been used on any major OE platforms for over 10 years. Car manufacturers have switched nearly 100% of their current production to the smaller 3" filter. With technology advancements in engines, oil, and filtration, the OE's switch to the smaller 3" filter is technically transparent to the engine. Beginning in the 2018 Service Champ catalog, new consolidations will be shown. Applications where the original filter is 3 5/8" will now list both the older 3 5/8" filter and the consolidated equivalent 3" filter. The 3 5/8" filters will continue to be available for some transition period. The 3" filters will be more economically priced and help lessen shop inventory. Most shops will eliminate 3 part numbers while maintaining the same coverage. Consolidations are listed below. Please call your Service Champ representative with any questions.
